One Coat Primer/Finish

600:303:

Pronto Industrial Paints

Award Winning British Coatings Manufacturer

Waterbased

One Coat Primer/Finish

Why do I need it?

600:303 was developed to give a high build, protective industrial finish, which is primarily designed as a one-coat system for steel fabrication, giving good exterior durability combined with resistance to certain chemicals, grease and oils.

Before

After

What does it do?

Colours and Appearance - Full Colour Offer, BS or RAL in a Semi Matt Finish.

Properties - High quality anti corrosive one coat finish for steel fabrication. Yields a sheen finish to give a good all round durable finish, resistant to mild chemicals, corrosive resistant, with good re-overcoating properties.

Shelf Life - 6 months in original unopened containers, dependent on temperature and conditions.

Application - Mix thoroughly before use. Airless spray is the recommended spray equipment. Touch dry in 60 min and full cure 7 days. Drying times are dependent on good air movement and relative humidity.

Coverage - 6m² per litre when sprayed in a single coat at a wet film thickness of 170 microns.
